

Switch energy supplier and help the Trust

Move to renewable energy supplier Good Energy and earn the Trust a contribution

Do your bit for climate change by following the Trust's example of using renewable energy. The surplus electricity generated by the wind turbine at Sculthorpe Moor is sold to Good Energy. If you change to 100 per cent renewable electricity by switching to Good Energy (www.good-energy.co.uk/hawkandowltrust), the Trust will receive £20 towards its conservation work.
