

Marsh harrier DVD

Six minutes of exclusive footage for just £5.95

A short film following the fortunes of one of the female marsh harriers that bred on our Sculthorpe Moor Reserve in Spring 2008 has been released on DVD.

With the reserve's state of the art camera systems the Trust was able to achieve an exciting first of film from a marsh harrier's nest. The mini-camera at the nest allowed pictures of the private life of the marsh harrier family to be fed back to the large plasma screen in the visitor centre and on to the Trust's new website.

Some of this unique footage also featured on BBC Springwatch. The six-minute DVD is narrated by vice-president David Cobham and captures the drama as this lone female struggles to raise her three young.

The six-minute DVD costs just £5.95 including post and packing. Order it online [here](#) or download a form to print and send by post.
